

Index to A.S.M.E. Transactions

Volume 51, 1929

This is essentially a subject index, and is not an index by titles. Articles treating a number of different subjects are listed under each of them. The alphabetical method is followed. If there is a choice of two or more keywords, the one most generally used has been selected for the subject head, and cross-references are supplied. To assist in locating material similar in character a note is included under the heading to "see also" certain other headings. Authors and discussors of papers are included. (D) denotes discussion.

The different sections of the Transactions are designated by symbols, the following being used: AER (Aeronautics), APM (Applied Mechanics), FSP (Fuels and Steam Power), HYD (Hydraulics), IS (Iron and Steel), MAN (Management), MH (Materials Handling), MSP (Machine-Shop Practice), OGP (Oil and Gas Power), PET (Petroleum), PI (Printing Industries), RR (Railroads), and WDI (Wood Industries). In the index three numbers follow the symbol for the section; the first is the volume number, the second the paper number, and the third the page number. Thus AER-51-18-93 signifies that the material is found in the Aeronautics Section, vol. 51, paper No. 18, on page 93.

A

Abbott, W. L.
Power development, FSP-51-1-1

Adendorff, John
(D) Apprenticeship in the rubber industry, MAN-51-15-138

Adler, Alphonse A.
(D) Stress distribution in rotating disks of ductile materials after the yield point has been reached, APM-51-16-180
(D) The peak-load problems in steam power stations, FSP-51-24-121

Aerial Navigation
See Aviation; Aerial Transportation

Aerial Photography
Map making, AER-51-18-93
Surveying methods, AER-51-18-93

Aerial Signals and Signaling
Course navigation on fixed airways, AER-51-11-58

Aerial Transportation
See also Aeronautics; Air Mail; Airplanes; Airports
Air-mail mileage and traffic statistics, AER-51-1-4
Air-mindedness, recent growth, AER-51-26-159
Amphibian plane advantages, AER-51-15-83
Developments, AER-51-1-4
Economy, AER-51-33b-202
Mileage of the world, AER-51-1-5
Passengers and goods transportation, AER-51-33b-207
Passenger traffic, AER-51-1-5
Private flying, AER-51-1-5
Railroads and passenger air transport, AER-51-27-163
Railroads, use by, AER-51-1-5
Traffic promotion, AER-51-13-74
Trends of the future, AER-51-26-159

Aerodromes
See Airports

Aerodynamics
